Moorfields
Eye Hospital **NHS**
NHS Foundation Trust

INSTITUTE OF
OPHTHALMOLOGY

Who is Moorfields?

- Moorfields Eye Hospital is the oldest and one of the largest centres of ophthalmic treatment, teaching and research in the world.
- More than half of UK-based ophthalmologists and many overseas experts received their specialist training at the Trust.
- In collaboration with the UCL Institute of Ophthalmology, we have one of the largest ophthalmic research programmes in the world.
- We became a foundation trust in 2004, and now have over **20,000** members.

What is Oriel?

Oriel is our proposal to build a new facility at the site of St Pancras Hospital in Camden, subject to consultation.

We would then relocate all services from Moorfields Eye Hospital on City Road and UCL Institute of Ophthalmology on Bath Street in Islington to bring together high quality eye care, leading-edge research and the world's best education in ophthalmology.

Camden CCG, on behalf of Islington CCG, will be leading a consultation on this proposal in 2019.

The partners

- **Moorfields** and the **UCL Institute of Ophthalmology** have established global reputations of excellence. We are top-ranked internationally as stand-alone institutions in the field of ophthalmology.
- **Moorfields** and the **UCL Institute of Ophthalmology** is the only hospital-university partnership in the UK that is ranked number one globally in any medical field.
- **Moorfields Eye Charity** supports Moorfields by providing financial support through grant-making. Philanthropy will play a critical role in the realisation of our vision for Oriel.

advancing eye health

Current context

- Our current hospital on City Road was built over **100 years ago**, at a time where a fundamentally different model of eye care was delivered.
- The hospital has been subject to piecemeal modifications, refurbishments and upgrade works throughout its history.
- We are by far the largest provider of inpatient and outpatient hospital ophthalmology services in England, over double the size of the second largest ophthalmic provider.

In 2017/18, Moorfields on City Road had **740,615 patient visits**, with more than **601,000 outpatients** and over **96,900 visits to our A&E**.

Potential benefits

- Brings together eye care, research, education and links to the wider network of care and social support
- Partnership approach will ensure designs around patient needs and informed by communities of residents and professionals
- Would support greater collaboration between patients, clinicians, students and researchers

Benefits for residents, patients and carers

Improved, easier and more comfortable patient experience
Better access to high quality care
Access to other care and support
Improved care pathway

Benefits for staff:

Better working environment to deliver best care
Attractive workplace will improve recruitment and retention
New pathways offer new job opportunities and career progression

Benefits for future research

New facilities would broaden scope and scale of research
Attractive to top talent
Research translated more easily into patient care.
Patients to join clinical trials

Benefits for training and education

Teaching facilities alongside UCL and service delivery would enhance and expand education and training.
Supports workforce development to meet future demands

Benefits for the NHS:

Greater operating efficiency to meet increasing demands
Support to developments in primary and social care.

Our preferred site

We want to build our new, integrated eye care, research and education facility on a two acre section of land at St Pancras Hospital.

St Pancras is;

- Close to the excellent transport links of Kings Cross and St Pancras International.
- It's close to other important health and research partners.

The proposal

People's sight matters

– 88% people surveyed considered good vision vital for overall health and wellbeing

Sight loss an increasing reality for many people – major eye diseases are expected to increase over next 15 years

Major advances bring new benefits – diagnostics, treatments, information sharing, new ways of working, fewer hospital visits

We have an opportunity to build

– a new purpose-built centre to improve research, care and patient experience

Planning for the future – current site in City Road outdated and overcrowded, hinders rather than supports innovation
